

NEW PRODUCTS GUIDANCE

A15

Grades for Stainless Steel Machining

AC6030M / AC6040M

New grades for stainless steel cutting with excellent wear and fracture resistance.

AC6030M employs Absotech Platinum, a new CVD coating exhibiting improved fracture and adhesion resistance.

AC6040M employs Absotech Bronze, a new PVD coating suppressing the progress of crater and flank wear.

NEM type

C6

Chipbreakers for Stainless Steel Machining

NEM Type

Achieves excellent wear resistance and cutting edge strength and thereby ensures stable turning of stainless steel thanks to an edge shape that enables smooth chip evacuation.
